Fishing Enthusiasts

We offer the convenience of a drive in lodge but the remoteness of a fly-in. We are the only lodge on the lake and fishing pressure is low. We are located deep in the forest surrounded by countless warm and coldwater lakes, rivers and streams. Many fishing programs have been filmed in the area because of the quality of the fishery. Fish species include walleye, northern pike, brook trout, lake trout, rainbow trout, splake, small mouth bass, herring, whitefish and ling. We are the only area in the province that offers fishing for the rare "Aurora Trout" as well.

The lodge is located on beautiful Burt Lake which has walleye, northern pike, trout, herring, perch & ling. Half the lake ranges from 80ft to 105ft deep and the other half is 6ft to 12ft in depth with many ledges, sunken islands and two islands above water. A short two minute walk will take you to Burt Lake #1. It is a smaller lake and loaded with pike. It backs onto Burt Creek which is a spawning ground for brook trout and there is no shortage of them. We are the only people who have access to this lake. A short five minute ATV or 4x4 ride will take you to Burt Lakes #4 & #5. These are stocked brook trout lakes. Burt Creek empties into the Englehart River which is behind the lodge and the fishing possibilities are endless with this water system alone. Many more lakes are within a 5-20 minute shuttle of us including the famous "Montreal River System".

Anglers find it worthwhile to make the trek here for the various benefits we offer. From Baffin Island to New Zealand anglers have come to visit us and fish the Arctic Watershed and its crystal clear waters that surround us. There are over 200 lakes & streams in the area for you to explore. Come and enjoy fishing for the various species in the area including:

Ontario's Wilderness Angling

Ontario's backcountry fishing is home to some of the best streams, rivers and back lake fishing anywhere in the world. Brook Trout (Speckled), Rainbow (Steelhead), Lake Trout, Aurora Trout, Walleye & Big Northern Pike frequent backcountry watersheds virtually untapped by human activity. These areas can only be accessed by horseback because the bodies of water are generally smaller than the traditional larger bodies and floatplane access is denied. Fly-fishing, float with live bait, jigs, spinners & body baits often produce some very nice trophy fish or some just the right size for the frying pan.

Our professional certified guides will help you locate and identify the particular specie you are pursuing. Let Wyndy River Expeditions & Guest Ranch plan your next angling getaway.
